How to Spec Type has 6 ratings and 1 review. rob said: Since this book was published in the late 80s, much of the process has been computerized and most. .

How to Spec Type describes a process that became outdated with the evolution of page makeup software in the years after the introduction of the Mac in Definition of type spec: Detailed instructions on the typeface(s), tpestyles, leading, etc., to be employed in setting a particular printing job. A tiny EDSL to write type-level-unit tests. A small example: import metalhit.comec main:: IO () main = print spec0 spec:: Expect Expect. In her seminal work, Thinking with Type, Ellen Lupton defines scale as "the size of design elements in comparison to other elements in a layout as well as to the.

A specification often refers to a set of documented requirements to be satisfied by a material, design, product, or service. A specification is often a type of technical standard. There are different types of technical or engineering specifications (specs), . This type of specification is a collaborative effort between a specwriter and a.

How to find out which type of Spec you are. When you need to find out in which kind of spec you are during run-time, it's definitely possible. It's a lot easier in. The Elixir Typespec docs show the following syntax for keyword lists in typespecs : # [key: type] # keyword lists # It's nice to have a syntax. The notation to represent the union of types is the pipe . For example, the typespec type:: atom() pid() tuple() creates a type type that can be either an atom, a.
